CORRECTION

Open Access

The International Stroke Trial database

Peter AG Sandercock^{1*}, Maciej Niewada^{2,3} and Anna Członkowska^{2,3}, for the International Stroke Trial Collaborative Group

Correction

Following the publication of our article [1] we became aware of errors introduced in the following variables which are all dates of events variables, i.e.:

DMAJNCHD: Date of above (days elapsed from randomisation)

DSIDED: Date of above (days elapsed from randomisation)

DRSISCD: Date of above (days elapsed from randomisation)

DRSHD: Date of above (days elapsed from randomisation)

DRSUNKD: Date of above (days elapsed from randomisation)

DPED: Date of above (days elapsed from randomisation)

DALIVED: Date of above (days elapsed from randomisation)

DDEADD: Date of above (days elapsed from randomisation)

FLASTD: Date of last contact (days elapsed from randomisation)

FDEADD: Date of death (days elapsed from randomisation)

FU1_RECDD: Date discharge form received (days elapsed from randomisation)

FU2_DONE: Date 6 month follow-up done (days elapsed from randomisation)

FU1_COMP: Date discharge form completed (days elapsed from randomisation).

These errors, that were introduced in the process of anonymisation, have now been corrected in the final, double checked version of the dataset, which is also available at the University of Edinburgh repository (see <http://datashare.is.ed.ac.uk/>). Both this corrected and the erroneous version of the dataset are available to allow comparison with any previous analyses of the data. The

corrected submission states clearly that it supersedes an earlier one.
